📍 Bangalore, India

EDUCATION

Sir M Visvesvaraya Institute of Technology
Bachelor of Engineering in Computer Science; CGPA: 9.0

Bangalore, India
January 2022 – July 2025

TECHNICAL SKILLS

Languages: Python, Java, SQL, Golang, Dart
Backend & AI: Spring Boot (MVC), Django, FastAPI, Generative AI (LLMs), Agentic AI (MCP)
Cloud & Big Data: GCP (BigQuery, Cloud Firestore), Docker, Kubernetes, CI/CD, Agile (Scrum)
Productivity: **AI-Augmented Development (Cursor, GitHub Copilot, Claude/ChatGPT)**
Databases: PostgreSQL (Indexing, Partitioning), MySQL, RESTful API Design

EXPERIENCE

Accenture Bangalore, India
Software Development Engineer *February 2025 – Present*

- Engineered self-healing **Agentic AI workflows in Python** (Google ADK, MCP), automating 45% of Tier-1 support tickets and slashing incident MTTR by 20 minutes.
- Utilized **AI-augmented development tools (Cursor, Copilot)** to accelerate feature delivery and complex refactoring, consistently exceeding sprint velocity benchmarks by 30%.
- Developed scalable microservices using **Java (Spring Boot)**, supporting 500+ daily concurrent users with 99.9% system uptime while adhering to RESTful API principles.
- Collaborated in an **Agile environment** to deliver rapid prototypes of AI-integrated features, ensuring alignment with customer needs and high-impact engineering operations.

Souloxy Remote
Software Development Engineer Intern *December 2024 – February 2025*

- Designed an **idempotent payment microservice** using Java and gRPC, processing \$500k+ in simulated monthly volume with ensured transactional consistency.
- Overhauled **PostgreSQL** architecture using table partitioning and custom indexing, reducing query latency from 800ms to 120ms for a dataset of 2M+ records.
- Containerized application services using **Docker**, reducing local-to-production deployment conflicts by 90% and standardizing the developer environment.
- Authored extensive API documentation, facilitating a 50% faster onboarding process for new backend developers.

Software Engineer (Freelance) Remote
Big Data & Full Stack Engineering *February 2023 – Present*

- Orchestrated high-throughput **Big Data pipelines** on GCP, utilizing Python (Scrapy) to ingest 50,000+ unstructured datasets/day with 99.9% data integrity.
- Optimized **Google BigQuery** warehousing strategies, implementing clustering and partitioning to handle large-scale data analytics for client reporting.
- Architected "Getset," a cross-platform logistics app (Flutter) utilizing **Firebase** and **Cloud Firestore** for real-time state management and geospatial tracking.
- Built and deployed a RESTful backend using **Django** on GCP Compute Engine, serving analytics data to client dashboards with sub-200ms response times.

PROJECTS

Enterprise Data Extraction Suite | *Python, Scrapy, Selenium, SQL* [Link to Repo](#)

- Developed a distributed crawling system capable of processing 20 pages/second, ingesting 10,000+ records into normalized MySQL schemas for AI model training.
- Implemented a **Selenium** headless browser cluster to bypass JavaScript rendering protections, automating data acquisition for dynamic property listings.
- Engineered robust ETL pipelines with automated error logging and retry mechanisms, ensuring data integrity across distinct data formats.

Secure Voting System | *Python, MySQL, Cryptography* [Link to Repo](#)

- Formulated a tamper-proof election system using MySQL ACID transactions to prevent race conditions during high-concurrency voting windows.
- Implemented role-based access control (RBAC) and real-time audit logging, ensuring strict compliance with security protocols.

CERTIFICATIONS & ACHIEVEMENTS

- **Java for ATCI** (June 2025) – Verified via Udacity — Advanced Backend Engineering Principles
- **Google Cybersecurity** (October 2024) – Credentials: 7MZ86KJFAL65 — Network Security & Risk Management
- **Hacktoberfest (2022, 2023)**: Top 5% Contributor to open-source repositories; recognized for quality PRs.
- **Robotics Club Core Member**: Led a team of 5 to finals in inter-college robotics competitions (SMVIT).
